## VACANCY: MATHEMATICIAN

Description of the position:

- Leader of the Mathematics area of knowledge.
- Belonging to the Wind resources assessment and forecasting Service (Wind Energy Department).
- Description of the job: Mainly to develop statistical models in the area of wind resources assessment and forecasting and also to develop mathematical models for other areas of wind energy.
- The leader of this area will be coordinating a staff of at least two other mathematicians.
- Requirements of the candidate:
  - At least 5 years of experience in mathematical modelling.
  - Solid background in statistics.
  - Experience in R&D projects.
  - Experience in project management.
  - Experience in software development.
  - We are looking for one person with initiative, being able to find mathematical solutions for the typical problems that appear in forecasting and wind resources assessment and, in a general sense, in the wind energy area.
  - Fluency in English (required).
  - Fluency in Spanish (desired). We will not reject candidates because of this requirement.
- Permanent position and competitive salary according to the experience.
- Candidates must be Spain based.
